## Machinern, &c.

A NEW THING ENTIRELY—The most astonishing performance heard of Barrels, Firkins, Kegs, and the whole cooper family reade and finished, without a defect, air-tight, and smooth enough to variels, entirely by Machiner.

Our Machine, with the tools used to perform the work, is a patent, for which we have received Gold and Silvet Medals and State Diplomalit takes the timber in the bolt, saws the stave hollowing in the grain, cuts them all of equal length, planes both in and outside perfectly smooth, tries the quality of the timber, joints them in a perfect manner, giving each stave its equal proportion of biles, eccording to its width, be it wide or marrow; chamfers howels, cuts the crease, turns the head, and prepares the barrel or keg for the hooping process, in a manner seperfect, complete, and of superior finish that we challenge the World to produce a better barrel, first ner keg, than our Machines make, at the rate of 36s per day to the single set—to which we invite the particular attention of all who choose to give them inspection. We manufacture articles of the harrel femily from the smallest white lead keg to the largest cask in general use, all of which can be warranted to hold the most subtle liquids, or be adapted to the packing of dry goods. In fact the machines cannot make an imperfect article except the defect is exclusively in the timber.

We have a shop at Elmira, N.Y., directly on the fine of the New-York and Erie Railroed, and the Elmira and Niagra Falls Railroed, five unnutes walk north of the depot, where any persons who wish can witness the operation of the machines, and test, to their perfect satisfaction, every brunch of the work. We will fired the utmost pleasure in exhibiting to such, everything connected with the work.

Persons desirous of purchasing the Right and Machines for any location now unroad, can obtain any information in relation thereto by applying to us through the mail. There are but a few of the States remaining in our hands unsold, still, applicants will be referred to the p

COCHRAN's CRUSHING MACHINE can be seen United by the seen of the planing Mill in 18th-st, between 9th and 16th avs. Parties in want of adequate snachinery for crushing and pulverizing Quartz Rock, Iron, Lead, Copper and Silver Ores, and other equally hard substances, are invited to witness the operations of these powerful but simple Machines. For further particulars, apply to these powerful but simple Machines. For further particulars, and the Chingres division of the Panama Railroad.

The following letter is from Gen. Norris, late Chief Engineer on the Chingres division of the Panama Railroad.

New York, Wednesday, Jan 19, 1853.

Mesers. E. & J. Bussing & Co.—Gentlemen: I have examined closely into the component parts of Cochan's Crushing and Poliverizing Machine, and pronounce it, without any exception, to be the only perfect machine for its purpose. I have seen it in full work, reducing that rock (pieces of two to three inches disc,) to impalpable powder by the second of time:

The merits of this machine are as follows, viz:

y the second of time:
The merits of this machine are as follows, viz:
1. Power to reduce to impalpable powder four tuns of hard quartz

et bour.

2 Simplicity of construction, requiring no repairs.

3. The more it is used, the more perfect and true become its parts.

4. Wear and tear excessively trilling, although exerting tremendous

force.

5. The granulation of metals, so requisite, and which cannot be obtained by any other process.

6. It can never set out of order; it is "Semper Paratus."

1 annex order for the of the two foot ball Machines, and shall extend the same to four or five more, as soon as roads are opened for their conveyance.

Yours intly.

New-York, Saturday, Feb. 23, 1833.

Conveyance.

New-York, Saturday, Feb. 23, 1833.

J. W. Cochrane, Esq.—Dear Sir: In company with a Committee of the American Institute. I had the gratification to inspect your "Patent Quartz Crushing Machine," and to witness its working, and have great pleasure in adding my testimony to theirs as to the very complete and rapid manner in which the hardest mineral substances, such as grantic quartz, &c., &c., were reduced to an almost impaipable powder. The principle of its construction is simple and must insure a a great economy of time, labor and expense in separating the "precious metal" from the quartz in which it is embedded, for which use I think it was principally designed by you, and is a further illustration of the readiness with which American ingenuity supplies a "want" as soon as experienced. Very respectfully yours, &c..

I was one of the Committee of the American Institute, and fully concur in the above certificate of P. S. Van Rensselaer.

At the late Fair of the American Institute, the highest premium, a Gold Medal, was awarded to J. W. Cochran for the best Quartz Crusher.

TMPROVED SEWING MACHINE—For Cloth or Leather.—The attention of the sewing people of this country is called to a new and improved machine, adapted to all the different varieties of work—either cloth or leather—light or heavy. It is simple in its construction, not liable to set out of order, is afforded at a less price than any other machine capable of doing the same work, and can be worked by hand or foot power. Wherever these machines have been used, they have given universal satisfaction. Persons interested are requested to call and examine them in operation.

R. R. POTTER, No. 42 John-st.

LIGHTNING RODS—OTIS'S PATENT INSULA
TED LIGHTNING CONDUCTOR.—Its construction is entirely

HENRY H. LEEDS & Co. respectfully announce that they will sell at Auction, on THURSDAY and FRIDAY, 20th and 29th April, at the residence of J. P. Beaument, Esq. No. 19 Chambers-at, pear the Irving House, his COLLECTION of PICTURES, being one of the most extensive and valuable Cabinets ever disposed of in this country, consisting of over 200 original specimens, many of them well-known in the history of the Fine Arts, having been purchased by him at the sale of the King of Holland's Gallery, and from other well authenticated sources, including also a number of modern Pictures of great beauty. Among the Italian Misters represented in the Collection, will be found beautiful works by Domenichino, L. Carracci, Salvator Rosa, P. Lauri, Matteo Roselli, Canaletto, and others. Also, of the great Spanish school are important works by Murillo, Zurbaran, and Alonzo Cano. The collection is likewise especially rich in specimens by the great constellation of arrists of the old Dutch school, from the year 1600 to about 1630, as Ruyadad, Wouvermans, Hobbena, Teniers, Cupp, Van Goyen, Van Artois, Brakonburgh, &c. In this department will be found the picture of Jephla Meeting his Daughter, after his rash vow, by Paul Bril, well-known to connoisseurs, having been many years in the possession of its present owner. The whole will be found well worthy the attention of all lovers of the Arts, the entire collection, with one or two exceptions, having been selected and imported expressly by the proprietor himself, whose experience in maltizers of Art has been well proved during twenty-five years' residence in this city. They may be viewed on Tursday and Wednesday preceding the sale. Catalogues at our store five days previous.

HENRY H. LEEDS & Co. will sell at Auction on Tursday and Wednesday preceding the sale.
